CyberPower®

RMCARD205

Remote Management Card

Remote Monitoring & Management Capabilities

Multi-Language Interface	Real-time Monitoring	Event/Data Logging
Hot Swappable	Multiple Alert	Auto-Shutdown

CyberPower Remote Management Card is an optional choice to be added to any of the Smart App UPS systems and Emergency Power Systems (EPS) for remote management and configuration of the device via standard web browsers, network management system (NMS) or command line interface. Administrator can access, monitor and perform remote management including scheduled-shutdown, startup and reboot, multiple alert notification by e-mail, SNMP traps, Syslog, and SMS, flexible event action setting, event logging and data logging. With its hot swappable capability, the systems can remain 100% uptime and available for connected equipment when installation or replacement is performed.

APPLICATIONS
- Back Office
- Server Room
- Data Center
- Industrial Factory
- Power Generation

COMPATIBILITY
- Office Rackmount Series UPS (OR series)
- Professional Series UPS (PR series)
- Emergency Power Systems (EPS)
- Automatic Transfer Switch (ATS)
  (selected series may not be available in your region)

CISCO Compatible

CyberPower® works with Cisco on the latest version of EnergyWise™ Compatibility.
Go to http://www.cpsww.eu/products/pdu/cisco_disclaimer.htm for complete disclaimer.

SERIES FEATURES
- Real time UPS/EPS/ATS monitoring
- Remote management and configuration of the UPS via Web Browser, NMS or Command Line Interface (SSH and Telnet)
- Trigger servers/workstations to shutdown during a power event to prevent data loss or corruption
- Schedule shutdown/start-up/reboot of the UPS/EPS remotely
- Schedule shutdown/start-up/reboot of each outlet of the ATS remotely (Switched type)
- Event logging to trace UPS/EPS/ATS operational history
- Graphic data logging to analyze power conditions
- Save and restore configuration settings
- Event notifications via e-mail, SNMP traps, Syslog, and SMS
- Support IPv4/v6, SNMPv1/v3, HTTP/HTTPs, DHCP, NTP, DNS, SMTP, SSH, Telnet, FTP, and Syslog protocol
- Support Email Secure Authentication Protocols: SSL, TLS
- Support External Authentication Protocols: RADIUS, LDAP, LDAPS, Windows AD
- SNMP MIB available for free download
- User upgradeable firmware
- Upgrade firmware and upload configuration files to multiple units at once
- Multi-language user interface (English, Chinese, Spanish, German, French)
- Quick installation
- Hot-swappable (plug-n-play)
- Cisco EnergyWise™ Compatible
- Support Environmental Sensor (ENVIROSENSOR)

PowerPanel® Business Edition
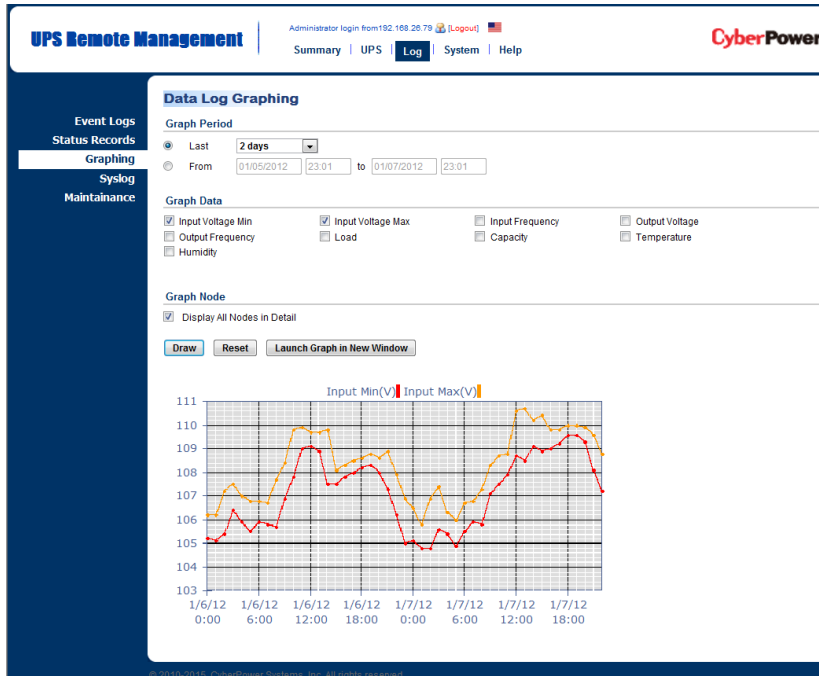

Auto-shutdown Software
PowerPanel® Business Edition Management Software is compatible with Windows 10, 8, 7, Vista, XP, 2000, Windows Server 2012, 2008, 2003, VMware Esxi, Citrix XenServer, Linux and Mac.

*Software functions may vary due to firmware version and/or hardware constraints.

TECHNICAL SPECIFICATION

Model	RMCARD205
Remote Management	Web, Console, NMS, CLI
Auto Shutdown	Workstations, Multiple Servers
Upgradable User Firmware	v
Auto Event Notification	E-mail, SMS, SNMP TRAP, Syslog
Remote Scheduling	Shutdown, Startup, Reboot
Ethernet Speeds (Mbps)	10/100
Auto Shutdown Clients	50
ENVIROSENSOR Compatible	v
