Revolutionary Design

Bullet M is the latest version of the popular Ubiquiti Bullet. Like its predecessor, Bullet M is a wireless radio with an integrated Type N RF connector that can be directly plugged in to any Antenna* to create a powerful and robust outdoor Access Point, Client, or Bridge.

The Bullet M features a signal strength LED meter for antenna alignment, a low-loss integrated N-type RF connector, and a robust weatherproof design.

With up to 600mW of power and enhanced receiver design, the Bullet M is ideal for long-distance links, capable of 100Mbps+ real TCP/IP speeds over multi-km distances.

Zero Variable Deployment

Bullet M eliminates the need to use RF cables and requires no special antenna or tools to install. No radio card / host board issues. No RF cable quality concerns. No mechanical stability concerns. No enclosure mounting requirements. With the Bullet M, operators can just plug and go.

Integrated AirMax Technology

The Bullet M can instantly become a powerful TDMA BaseStation utilizing Ubiquiti's breakthrough AirMax technology. With AirMax, PtMP networks can scale gracefully while maintaing high throughput and low latency performance.

Usage Example

Sector Antennas, Omni Antennas, Dish Antennas, etc.; any Antenna can easily be transformed into a powerful and robust outdoor Access Point, Client, or Bridge by simply plugging in Bullet M.*
