

## DS-MDS001 8 Ports Desktop Dock Station

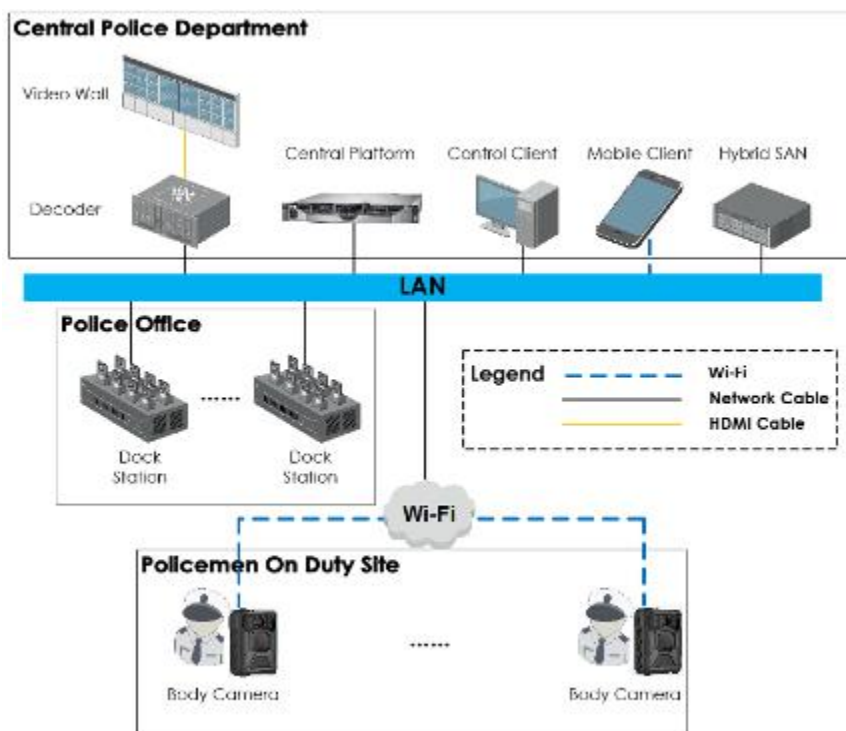

Dock station is designed for collecting data from body cameras. It provides you a simplified way to access and back up data.

- 1000 M dual network interface.
- Collects data from multiple body cameras.
- Charges, uploads data, and cleans the storage space automatically.
- Prevents data loss via ANR (Automatic Network Replenishment).
- Cyclic covering: Files will be covered automatically according to the storage timeline when there is no enough space.
- Reads time, date, product No., etc. of the body camera automatically.
- Plays videos, audios, and images.
- Log management.

## ▪ Specification

Screen	
LED	No
Storage	
HDD	Up to 4 disks, Max. 8 TB and default 2 TB for each disk
Network	
Protocol	HTTPS, FTP, NTP, SADP, ISAPI
Interface	
Audio	Audio output: 1 built-in speaker
USB	USB 3.0
Indicator	Power indicator, hard disk indicator, network indicator (1 pair), body camera indicator × 8
Button	Power switch
General	1000 M dual network interface
Body Camera	Up to 8 body cameras
Base	DC 5 V, 1.5 A for each channel, rate ≥ 8 MB/s
VGA	No
HDMI	No
General	
Operating System	Linux
Power	Input: AC 100 V to 240 V, consumption < 250 W
Operating Condition	-10 °C to +55 °C (14 °F to 131 °F), humidity 95% or less (non-condensing)
Dimension	400 mm × 300 mm × 124 mm (15.75" × 11.81" × 4.88")
Weight	Approx. 7.1 kg (15.65 lb.)
Installation Method	Desktop
Approval	
EMC	CE-EMC (EN 55032: 2015, EN 61000-3-2: 2014, EN 61000-3-3: 2013, EN 50130-4: 2011 +A1: 2014)
Safety	CE-LVD (EN 62368-1: 2014/A11: 2017) CB IEC 62368-1:2014 (Second Edition)
