

About DefendaStrip®

We are DefendaStrip Ltd, proud designers and manufacturers of a brilliantly versatile, visual and physical deterrent to intruders and trespassers.

Using our experience and background in architectural design and town planning, we developed a cost effective, quick to install plastic anti-climb product.

This intelligent design can be used across many areas and surfaces in a wide range of environments whilst minimising the risk of serious injury.

PROTECT.
DETER.
DEFEND.

A safer, smarter solution for protecting your assets from trespassers.

Unauthorised access to pipes, buildings and all kinds of installations is a chronic menace in the commercial and residential sectors. We understand that our clients are looking for an intelligent, flexible and cost-effective approach to deterring intruders from their premises and assets whilst minimising the risk of injury or complaint.

DefendaStrip® can be used on almost all surfaces and spaces. It can be cut precisely to fit awkward areas and unlike most other intruder deterrents, bends both ways to fit both rounded surfaces and corners. DefendaStrip® is the perfect choice for covering most sized pipes & crossings, walls, mechanical plant & equipment, roofs, stanchions and fences. It can even be embedded into pipe coatings or felt roofing.

DefendaStrip® is a brilliantly versatile visual and physical deterrent to intruders that can be more efficiently deployed than less flexible, more expensive metal and plastic competitors. The intelligent design features defensive cones specially formed to present an unstable walking or climbing surface to trespassers.

- Strips lock together to form continuous runs.
- Can be used with many types of fixings – steel banding, nails, screws, adhesive, double-sided tape.
- Easy, quick and economical to fit.
- Discreet when fitted in sensitive locations.
- Can be manufactured and modified in different colours (MOQ required) to complement surroundings and to suit challenging environments.
- It is UV resistant and can also be recycled at the end of its useful life.
- Unlike many metal anti-intruder deterrents, DefendaStrip® can be used at any height if used with appropriate signage.
- Designed and manufactured in the UK, DefendaStrip® is stackable for easy, cost-effective storage and distribution.
